SPRING - 1958

TOP QUALITY EVERGREEN STOCK

MAY WE SUGGEST THAT YOU ORDER EARLY

We offer the following seedlings for Spring shipment. All stock is offered subject to prior sale and subject to any damage caused by weather or any other cause between date of order and shipping date. All orders are shipped at the risk and cost of the purchaser. Our liability ceases when trees are delivered to carrier. If breakage occurs or if stock suffers through delay in transit claims should be made on the transportation company immediately.

All orders must be accompanied by cash or a 25% deposit. The balance will be shipped C.O.D.

Give second choice on late orders. Order your trees now while they are available.

All prepaid orders will be packed free of charge. Minimum order \$5.00. Under \$5.00, add 50 cents for handling charge.

SCOTCH PINE

For the very best Christmas Tree. All listed can be used for direct field planting.

	Size	Per 100	Per 1000
Scotch Pine			
2-yr. Seedlings	2-4 in.	\$2.50	\$12.50
2-yr. Seedlings	3-6 in.	4.00	20.00
2-yr. Seedlings	4-8 in.	5.00	25.00

Riga Scotch

2-yr. Seedlings	2-4 in.	3.00	15.00
2-yr. Seedlings	4-8 in.	5.00	25.00

Christmas Tree, Ornamental and Timber.

3-yr. Seedlings	2-4 in.	4.00	20.00
3-yr. Sdgs. (SOLD OUT)	4-8 in.	7.00	35.00

We have had many requests in the past for small seedlings that a person many secure at a low price and then put these in transplant beds for a few years prior to field planting. For these people and for others who have the same idea we are now for the first time listing this small size at a low figure. We do not recommend these for direct field planting except in areas where they have proved themselves. The size of the following seedlings are one to two inches. Net price. No discounts.

For Transplanting } Scotch Pine — \$ 7.50 per 1000
in Beds } Blue Spruce — \$10.00 per 1000

IMPORTANT

Add 3% Sales Tax for Pennsylvania destinations or supply exemptions complete with license number.

Recommendations for Planting Trees

TIME TO PLANT

Experience has taught us that best results are usually obtained from Spring planting — March 25th to May 15th. Although fall planting is sometimes satisfactory we do not recommend it and do not take orders for fall shipping.

CARE OF TREES UPON ARRIVAL

Your trees are worthy of the best of care. After receiving your shipment unpack immediately and remove all of the packing material. The roots should not be exposed to the sunlight and drying winds. Dig a trench deep enough to hold the roots and long enough to hold all the trees in a place convenient to the planting site and if possible in a shaded location such as the North side of a building or woodlot and near a supply of water. Place the roots in the bottom of the trench and fill in fine moist soil then pack it firmly about the roots to exclude the air. If the ground is dry moisten the earth around the roots.

HOW TO PLANT

Experience has taught us that it is not necessary to prepare the soil in any way before planting, as the additional expense is not justified and we find that the grass and weeds prove a benefit in conserving the moisture and give shade during the first few years after planting. Do not use any kind of fertilizer on the soil.

In planting trees three men work well together, one man digs the holes with a mattock, the other two follow with buckets of trees immersed in soupy mud until planted. After digging a hole deep enough to accommodate the roots be careful to spread the roots out, then pack good fine soil around them which will insure success.

One man may work to good advantage. Carry the trees in a bucket. With a swing of the mattock make a slit in the ground. Hold slit open with mattock, insert roots, remove mattock and pack ground firmly with heel.

When trees are planted too close together, they crowd and the resulting competition speeds the height growth and tends to make a poor Christmas tree. Many different opinions are offered on tree spacing. Four feet by four feet spacing requires 2720 trees to the acre and may be used where thinning is contemplated at a comparatively young age. Five feet by five feet spacing requires 1740 trees to the acre and is most generally used as it allows for the Christmas tree thinning and will still leave a good stand of timber. Six feet by six feet spacing requires 1210 trees per acre and is recommended where trees are planted for forestry products and thinning is intended for Christmas trees.
